Project 1: SimpleDB Basics

Names: Chanchal Kariwala (u1134986), Archanasri Subramanian (u1141789)

- We did not make any major design decisions. Project 1 involved simple and straightforward changes.
- We did not make any changes to the API. We created one new class- 'HeapFileIterator' in HeapFile.java that implements the 'DbFileIterator' iterator for the 'iterator()' method in HeapFile.
- We have completed all the elements of the code to our best knowledge.
- We spent about 15 hours on the project. Some bits of HeapPage and HeapFile were confusing. We spent some time in trying to figure out the Header in HeapPage. HeapFile's 'readPage()' and 'iterator()' methods were a little time-consuming,
